

USE & CARE INSTRUCTIONS

EASY TO FILL

Wide top allows you to fill with ease.

Filling the Feeder

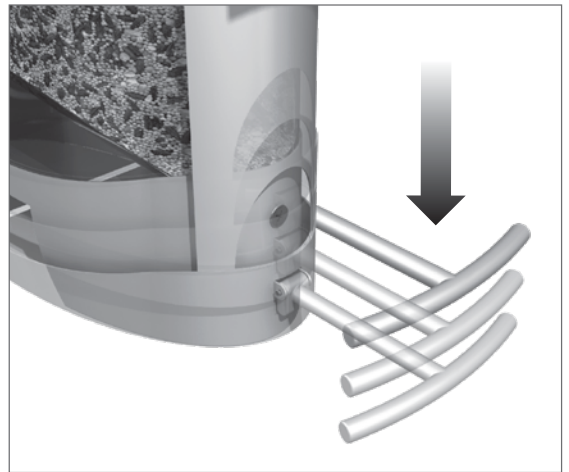

Step 1: Remove locking metal roof by squeezing the plastic tabs located under the rim and lifting.

Step 2: Pour seed into the wide top.

Step 3: Lock roof back onto feeder by placing it on the feeder opening and pushing down until you hear a click, as the roof locks onto the plastic tabs. Your feeder is now ready to hang.

Cleaning the Feeder

Remove locking metal roof by squeezing the plastic tabs located under the rim and lifting. Hand wash with warm water and a mild antibacterial soap. Rinse thoroughly and let dry completely before refilling with seed. If seed gets caught in the bottom beneath the perches, depress the two plastic tabs on the bottom at the same time to remove the metal base. Slide metal base back into plastic base and make sure the plastic tabs click back into place.

Squirrel Proof Ports

Sliding metal sleeve closes all ports simultaneously when a squirrel's weight is applied to any perch or the roof.

Use Stokes Select® Squirrel Feeders & Squirrel X Accessories to Deter Squirrels from Bird Feeders

Other Squirrel Proofing Tips

- Place pole at least 15 feet away from any place a squirrel could jump from
- Use a Squirrel X Squirrel Baffle on pole below feeders to deter squirrels
- To help divert squirrels from bird feeders, use Stokes Select® Squirrel & Critter Food placed away from bird feeders
